

# Access to natural environment: Breakdown by disability

Downloaded from <https://www.canterburywellbeing.org.nz/our-wellbeing/environment/access-to-natural-environment/#ink-breakdown-by-disability> on 01/09/2024 5:38 PM

The figure shows a substantial and statistically significant difference in the proportion of respondents with and without a long-term health condition or disability (irrespective of age group), who indicated that they were satisfied or very satisfied with their ease of access to the natural environment between 2017 and 2022. In 2022, 84.7% of those without a long-term health condition or disability were satisfied or very satisfied; compared with 75.2% of those aged under 65 years with a long-term health condition or disability and 59% of those aged 65 years and over with a long-term health condition or disability.

A higher proportion of the younger (under 65 years) age group with a long-term health condition or disability was satisfied or very satisfied with their ease of access to the natural environment, compared with the older group, at all timepoints. This difference was statistically significant in 2018, 2019, and 2022.

## Data Sources for Access to natural environment

**Source:** Te Whatu Ora Waitaha Canterbury - formerly Canterbury District Health Board.

**Survey/data set:** Canterbury Wellbeing Survey to 2022. Access publicly available data from Te Mana Ora | Community and Public Health website [www.cph.co.nz/your-health/wellbeing-survey/](http://www.cph.co.nz/your-health/wellbeing-survey/)

**Source data frequency:** Annually.

Metadata for the Access to natural environment indicator is available at <https://www.canterburywellbeing.org.nz/index-data>
